OBJECTIVE

I am a result-driven Fullstack Developer with a passion for building scalable web applications and solving complex problems. Offering a solid foundation in front-end and back-end development, coupled with expertise in JavaScript, HTML, CSS, and server-side languages. Proven track record of delivering high-quality code and collaborating effectively in cross-functional teams. Seeking a challenging role to leverage my technical skills and contribute to the success of a dynamic organization.

EXPERIENCE

FULL STACK DEVELOPER

Decagon. lagos | Sep 2022 - Jun 2023

Collaborated with cross-functional teams to ensure projects are delivered on time and to client specications.

Debugged and tested code to identify and resolve technical issues.

Creating documentation and providing technical support to clients and team members.

Wrote maintainable and extensible code in a team environment

Stored, retrieved and manipulated data for close analysis of system capabilities

Designed and developed multiple web applications from conception to deployment using modern front-end technologies such as React, as helping back-end engineer with technology such as Node.js, Express.js, and MongoDB.

Created and implemented RESTful APIs to ensure seamless communication between the client and server side of applications.

FRONTEND DEVELOPER

Centbit. Lagos | Jun 2023 - Present

Designed and developed multiple web applications from conception to deployment using modern front-end technologies such as React, as helping back-end engineer with technology such as Node.js, Express.js, and MongoDB.

Created and implemented RESTful APIs to ensure seamless communication between the client and server side of applications.

Collaborated with cross-functional teams to ensure projects are delivered on time and to client specications.

Debugged and tested code to identify and resolve technical issues.

Created documentation and providing technical support to clients and team members.

Wrote maintainable and extensible code in a team environment

Stored, retrieved and manipulated data for close analysis of system capabilities

EDUCATION

BAED

University of Benin. Benin | Oct 2010 - May 2015

PROJECTS

Marsquest : <https://www.marsquest.com/>

The Clothing eCommerce Website is a full-stack web application i built using React, CSS, HTML, CSS3,Code Reviews, MongoDB, Node.js, and Express. I built this website to allow customers to browse, purchase, and manage their orders of clothing products online.

Best Buy Rdp : <https://bestbuyrdp.netlify.app/>

Worked on a marketing website for an RDP/VPS services company offering a wide variety of RDP Servers and related services.Worked on the front end of this application.Built with React Js, Redux, Styled Components, Express, MongoDB. CI/CD, Redux, Node.js, CSS3, ReactHooks, JavaScript, Agile, REST/RESTfulAPIs, and Scrum.

William Hunt - <https://www.williamhunt.co.uk/>

A clothing website I built for an employer using React, CSS, HTML, MongoDB, CSS3, Node.js, and Express. The website is designed to allow customers to browse, purchase, and manage their orders of clothing products online.

Chicago City Sports - <https://chicagocitysports.com/>

This project is an ecommerce website for sports enthusiasts to buy sports-related products like equipment, clothing, accessories, and more. I built this website using React, CSS3, and HTML for styling and layout, and Node.js and Express for the back-end. The database used is MongoDB.
